

Homeobotanical Remedies help relieve the symptoms of many health conditions, including:-

Asthma, breathing difficulties, anxiety, sprains, strains and bruising, falls, knocks, shock, allergies, hay fever, tiredness, food intolerance, PMS, fertility, menopause, period pain, all pain, mood swings, migraines, spasms, colic, bloating, coughing, colds & flu, forgetfulness, brain fog, insomnia, lack of energy, nausea, bowel issues, rheumatic pain, arthritis, heartburn, stomach upsets, varicose veins piles just to mention a few!..

The Physical action includes organ drainage to stimulate targeted organs and systems in order to effect the elimination of toxins.

The nutritional component, assists in the assimilation of vitamins, minerals, enzymes and other micronutrients and the **synergistic** action reinforces whatever other healing techniques are being employed as Hb's are a 'core' therapy which re-enforce all other healing practices in order to maintain balance within the body.

The **Dynamic action** arises from homoeopathic potentisation and enables these remedies to directly stimulate healing within the body. The low potency adopted produces a gentle, sustained response resulting in remarkably few problems even in sensitive people.

They work with the body's own immune system, stimulating it into action at a cellular level.

First they purify the system by opening up all of the body's own natural drainage channels. Then the components of the selected herbs target the problem areas to encourage the immune system to activate and commence healing and finally they enhance assimilation of nutrients to speed up healing and to boost energy levels to attain vibrant health. Their actions are:

Clearout, normalise (or balance) and re-build
